

Wenig Saltiel LLP

Sales Companion | July 20, 2026 | Rep: Jacob Meissner

Prospect Snapshot

Owner	Revenue	Team	Stage	Close Rate	Location
Jeffrey L. Saltiel (semi-retired)	~\$1.98M (HubSpot est.)	8 attorneys	Stage 3	N/A	Manhattan / Staten Island

Dominant Buying Motive: TIME BACK

Jeffrey wants his own hours back from manual pre-bill review and document work — not more revenue or lower costs.

"3-hour, bi-weekly manual review of paper pre-bills"

"~1 hour"

"not necessarily to cut costs or grow revenue"

What he wants:

- **Cut the pre-bill review.** Reduce his 3-hour, bi-weekly manual review of a 3-inch paper stack to about 1 hour.
- **End manual document assembly.** Stop building documents by hand, file by file.
- **Modernize ProLaw billing.** Bring a modern workflow to the firm's legacy billing system.
- **Get his time back.** Use semi-retirement for himself, not for paperwork.

What is stopping him:

- **No delegation exists.** Jeffrey is the entire pre-bill review system himself today.
- **No automation in place.** Document assembly and billing both remain fully manual.
- **Legacy ProLaw system.** Billing runs on an older platform with nothing modern layered on top.
- **Revenue is an estimate.** \$1.98M is HubSpot-sourced, not transcript-confirmed — verify live on the call.

Why This Legal AI Workforce Package

What it does for him:

- Cuts his bi-weekly pre-bill review from about 3 hours to about 1 hour.
- Removes manual document assembly from his and his staff's workload.
- Brings a modern workflow to ProLaw billing without forcing a system migration.

Legal AI Workforce — Fractional CTO L2 | \$4,997/mo bundled

- Revenue estimate (\$1.98M) fits L2's \$1.5M-\$3M target band, not L1's \$500K-\$1.5M band.
- Scope spans 3 distinct workflows (pre-bill, document assembly, ProLaw integration) — matches L2's multi-workflow build cadence.
- Bundled price sits mid-range in the informally discussed \$3,800-\$7,000/mo call range.
- L1 (\$3,297/mo) is the fallback tier if the CTO scoping call finds lower complexity than currently scoped.

Why This Foundation Sprint (One-Time Onboarding)

What it does for him:

- Covers the real integration lift of exporting and mapping legacy ProLaw billing data.
- Gets the first pre-bill review and document assembly workflows built and tested.
- Is a one-time cost, not an ongoing add to his monthly bill.

Law Firm AI Foundation Sprint | \$14,997 one-time bundled

- Paired price with Fractional CTO L2 saves \$5,000 versus the \$19,997 stand-alone price.
- Justified by the real ProLaw data export/import lift, not a generic onboarding fee.
- Separate from, and in addition to, the \$4,997/mo recurring Fractional CTO L2 fee.
- No marketing or coaching package is included — this is a single-product LAW engagement.

Why This Investment Fits

What it does for him:

- Gives Jeffrey back roughly 2 hours every pre-bill cycle without asking him to grow the firm.
- Keeps every dollar of spend tied to time saved, not to leads or ad platforms — there is no ad spend in this deal.

Investment Structure:

- **Recurring:** \$4,997/mo — Legal AI Workforce, Fractional CTO L2.
- **One-time:** \$14,997 — Law Firm AI Foundation Sprint, paired with L2.

Spend Cap Check:

- \$1.98M revenue ÷ 12 = ~\$165,042/mo. 35% cap = ~\$57,764/mo.
- \$4,997/mo is far under the cap — no scoping approval issue on spend.

Revenue figure is an estimate. Confirm on the July 20 call.

Escalation — confirm before proposing:

- Confirm LAW delivery has launched and has capacity before finalizing this proposal.
- Confirm actual revenue and re-check L2 vs. L1 tier on the live CTO scoping call.

If He Pushes Back

"Will AI replace attorney judgment / is it safe?"

All AI-generated output goes to a draft folder for human attorney review before anything is sent — direct from the call.

"How does this integrate with our legacy ProLaw system?"

Jeffrey exports data from ProLaw, and SMB Team builds the custom integration on top of it — direct from the call.

"Is \$4,997/mo justified given no stated revenue?"

The informally discussed call range was \$3,800-\$7,000/mo; \$4,997 sits mid-range, and the \$1.98M revenue estimate (via HubSpot) comfortably supports it.

Investment At A Glance

Legal AI Workforce — Fractional CTO L2	\$4,997/mo
Pre-bill review, document assembly, and ProLaw billing automation.	\$5,797 stand alone
Law Firm AI Foundation Sprint (one-time)	\$14,997
ProLaw data export/import and initial workflow build.	\$19,997 stand alone
Recommended Ad Spend	None — not part of this deal
This is a LAW-only engagement; no marketing package is proposed.	

Total: \$4,997/mo + \$14,997 one-time | Save \$800/mo + \$5,000 one-time by bundling | ~3.0% of estimated monthly revenue (under 35% cap)
