Dominant Buying Motive: LEGACY + FREEDOM

Build a respected Houston PI firm that generates consistent cases from systems — freeing Cox and Pradia to focus on the high-value work without chasing every case. (No transcript available — confirm DBM on discovery call.)

What he wants:

- **Predictable lead flow.** A paid system generating PI cases every month — not referral dependency.
- **Firm independence.** Operations that run without partner bottlenecks so Cox and Pradia choose their focus.
- **Revenue that matches their reputation.** 40+ years and Top 50 Black Attorneys in Houston — the numbers should reflect it.

What is stopping him:

- **No paid ads active.** Invisible to high-intent PI searchers while competitors spend \$250K–\$900K+/year on Google alone.
- **3-pack absent for every term.** Zero local pack visibility — zero free leads from Google Maps for any PI search.
- **NAP inconsistency.** Two addresses + three phone numbers across directories actively suppressing local SEO.
- **Review gap is widening.** 51 reviews at 4.4 stars vs. Zehl at 1,262 reviews and 5.0 — gets harder every month.

Why This Marketing Package

What it does for him:

- Captures Houston PI searchers currently going to Zehl, Simmons, and Terry Bryant — puts Cox Pradia at the top of Google Ads and LSA.
- Fixes NAP inconsistency, builds suburb landing pages, and activates review velocity — compounding local SEO gains every month.

Why This Ad Spend

What it does for him:

- Generates 19–47 qualified PI leads/month from Google, LSA, and Meta — feeds the intake team already in place.
- Conservative scenario projects \$150,000/mo in case revenue against \$13,200 ad spend — 11x return. (Est. only)

Conservative: \$13,200/mo | Aggressive: \$22,000/mo

- Conservative: PI hard floor PPC \$10K + LSA \$2K + Meta retargeting \$1.2K = \$13,200.
- Aggressive: \$1.5M goal x 20% / 12 x 1.5 Tier-1 geo = \$37,500. Capped at Starter limit: \$22,000.
- ROI: Conservative 3 cases x \$50K = \$150K (11x). Aggressive 7 cases x \$50K = \$350K (16x). Estimates only.
- **35% cap:** \$8,047 + \$22K = \$30,047/mo. Requires ~\$86K/mo revenue (~\$1.03M/yr). Confirm before presenting.

Avg. case value \$50K is a practice area default — not stated. Houston truck/TBI cases often \$150K–\$2M+.

If He Pushes Back

"Our cases come from referrals — we have never needed ads."

Zehl spends \$913K/year on Google Ads and has 1,262 reviews. Simmons spends \$384K/year and has 502. Both appear at the top of every search your prospects run. Referrals are not scalable — they are the result of relationships. The question is whether you close this gap before it gets wider.

"\$8,047/month is a big number right now."

At conservative ad spend, the projected return is \$150K/month in case revenue against \$13.2K ad spend — an 11x return. A single additional truck accident case at \$150K+ pays for the full program for the month. The cost of not acting is measured in leads Zehl captures while Cox Pradia waits.

"Houston PI is too competitive for us to win on ads."

Competitive means high volume — 70,000+ Harris County auto accidents per year. Your 40+ years of experience, structured team, and campaigns targeting TBI, truck accidents, and wrongful death can win cases in segments where even Zehl is not dominant. You do not need to beat everyone — you need to capture your share.
