

H. Benjamin Perez & Associates, P.C.

Sales Companion | August 7, 2026 | Rep: Jacob Meissner

Prospect Snapshot

Owner	Revenue	Team	Stage	Close Rate	Location
H. Benjamin Perez (Hector Perez, COO, on the call)	~\$1.98M (est., medium conf.)	~5	4	Not stated	Manhattan, NYC

Dominant Buying Motive: A FIRM THAT RUNS ITSELF

Hector wants growth that doesn't require the team working three times as hard — automation absorbing the repeatable work instead of more headcount.

"Hector Perez manages operations for H. Benjamin Perez, a family/criminal law firm"

"3x revenue within one year"

"numb to tech (describing H. Benjamin Perez)"

What he wants:

- **Growth without proportional manual work.** 3x revenue without the team working 3x as hard.
- **Someone else driving the rollout.** Wants a Fractional CTO leading it, not himself.
- **Proof before Ben leaps.** Ben is "numb" to tech and needs a clear ROI case first.
- **Relief on named bottlenecks.** After-hours coverage and the 27-of-39-step probate workflow.

What is stopping him:

- **Ben must personally approve every system.** Nothing moves without his sign-off.
- **A prior vendor pitch was rejected.** A ~\$50k proposal was cut — they were already doing that work in-house.
- **No financial baseline exists.** No revenue/case-value/close-rate figures — frame ROI as time/capacity, not dollars.
- **No in-house AI expertise.** Exactly why a Fractional CTO fits better than a DIY tool.
- **This was an evaluation call.** \$3,797–\$9,000/mo discussed was a range, not a confirmed budget.

Why This AI Automation Package

What it does for him:

- Puts a dedicated Fractional CTO in charge, so Hector isn't managing it himself.
- Targets his two named bottlenecks first — manual probate steps and uncovered after-hours calls.
- Gives Ben a measurable Phase 1 time-savings number before any Phase 2 ask.

Legal AI Workforce — Fractional CTO Level 1 | \$3,297/mo bundled

- Matches the call: Hector was quoted \$3,797/mo for one automation — this tier's exact stand-alone price.
- L1's "done-with-you" profile fits an owner who won't manage this himself — not L2's larger transformation scope.
- Optional: Law Firm AI Foundation Sprint paired with L1 — \$14,997 one-time — full build-out if scoped now.

Why not marketing:

- He asked to evaluate AI/CTO services, not marketing — package_decision.json's Full Service Marketing pick (\$7,497/mo) is overridden per the Call-Purpose Override (see section_11_workings.txt).
- Real lead-gen/SEO gaps exist (Sections 05–06) but weren't raised by Hector — flagged as a Phase 3 roadmap item, not pitched now.

H. Benjamin Perez & Associates — Sales Companion (continued)

Why No Ad Spend (This Round)

What it does for him:

- Puts 100% of the investment into the manual work he called about — no split budget before either is proven.
- Every dollar goes to the Fractional CTO work already priced out on the call — no new spend category for Ben.

Ad Spend Status:

- **This round:** \$0/mo — automation-only engagement, no paid ad spend included.
- **Future phase:** Once intake/case-prep capacity is built, a marketing package can be scoped from live research — audit Sections 05–06 already flag the gaps.

Automation ROI Framing:

- **Time recovered:** Automating probate steps and after-hours coverage removes recurring manual work. No hours/dollar figure was given — quantify with Hector during onboarding, not upfront.

No revenue figures were shared. Build any dollar ROI with Hector post-kickoff.

Why Level 1, Not Level 2:

- Transcript-quoted \$3,797/mo for one automation matches L1's stand-alone price exactly.
- Owner is "numb to tech" and wants done-with-you leadership — L1's profile, not L2's larger scope.

If He Pushes Back

"We already got burned by a \$50k proposal for stuff we were already doing."

Scoped to the exact automations Hector named — probate steps, after-hours coverage, intake-to-portal — at \$3,297/mo, close to the \$3,797/mo he was already quoted.

"Ben needs to see it work before we spend more."

Phase 1 targets the highest-friction automation first, so there's a measurable time-savings number to show Ben before any Phase 2 ask.

"Don't we also need help with marketing?"

Real and documented (Sections 05–06) — but it's Phase 3. Fixing intake/case-prep capacity first means the firm can handle the volume marketing would generate.

"We don't have anyone in-house who understands AI tools."

That's what the Fractional CTO role solves — Hector said he doesn't want to manage this himself, exactly the Level 1 profile.

Investment At A Glance

Legal AI Workforce — Fractional CTO Level 1	\$3,297/mo
Dedicated Fractional CTO; probate + after-hours + intake automation.	\$3,797 stand alone
Law Firm AI Foundation Sprint (optional, one-time)	\$14,997 one-time
Full build-out of Phase 1 automations; optional, not required to start.	
Recommended Ad Spend	\$0/mo — not included
Automation-only engagement; marketing scoped separately in Phase 3.	

Total: \$3,297/mo recurring (+ optional \$14,997 one-time Foundation Sprint) | Save \$500/mo by bundling | No ad spend this round — automation-only engagement
