Church, Page & Gailan, PLLC

Sales Companion | October 19, 2026 | Rep: Dan Bryant

Prospect Snapshot

Owner	Revenue	Team	Stage	Close Rate	Location
Kevin Page	Not stated (HubSpot $3M+)	19 (4 + 15)	Stage 4	Not stated	Yakima, WA (4 offices)

Dominant Buying Motive: FREEDOM (inferred)

The firm wants AI and automation to take manual, tedious work off the support team and to connect its systems.

The DBM is an inference. The call source is a Fathom summary, not a full transcript, so no verbatim quotes are shown.

What they want:

- **Reliable Filevine automation.** The current automation process is not working well.
- **Less manual support work.** Records requests, status updates, and scheduling.
- **Connected systems.** Cross-platform integrations are on the list.
- **Understand AI first.** They want to see what AI can do before defining automations.

What is stopping them:

- **No defined scenarios yet.** They are still evaluating AI before choosing what to automate.
- **Filevine limits.** Native AI (Lois) has helped some, but automation is weak.
- **Hiring ramp.** Support staff grow from about 15 toward 22 to 23.
- **Marketing off the table.** They called it outside the scope of this call.
- **Trial only.** AI Workforce Pro is a free trial, with no tier or price named.

Why This AI Leadership Package

What it does for them:

- A Fractional CTO leads the AI and Filevine work so it does not land on staff.
- Each month adds working skills and a custom automation.
- Manual work leaves the team before the next wave of hires arrives.

Fractional CTO Level 1 | $3,297/mo bundled

- Revenue fits: HubSpot shows $3M+ against the $400K floor for Level 1.
- The fCTO came up on the call as the way to scope Filevine automations.
- The level was not named on the call. Seller chose Level 1; confirm with the rep.
- Level 1: one monthly 1:1, up to 2 skills, and up to 1 custom automation a month.

Why This AI Platform Package

What it does for them:

- The whole team works from one shared, firm-managed AI workspace.
- Pre-built skills turn the trial they started into daily practice.
- A weekly implementation session keeps adoption moving.

AI Workforce Pro (19 users) | $3,277/mo bundled

- Price: $1,597 for the first 5 users plus 14 x $120 = $3,277. No stand-alone price.
- Seat count of 19 equals 4 attorneys plus 15 support staff. Confirm before sending.
- Yearly contract; 20M credits (10M + 10M bonus); overage $150/mo.

Why No Marketing or Ad Spend

What it does for them:

- Keeps the proposal on AI, which is what the call was about.
- Leaves room to add services later once automation is in place.

Why marketing was left out:

- The call was AI-led, and no lead-gen need was stated.
- Google Ads and LSA are already active, so there is no ad spend or ROI to project.
- They are a former SMB Team marketing client (parted 2024).
- Elite Coach Plus from the package file had no transcript basis and was removed.

Check before the call:

- Review counts are UNCONFIRMED. Verify live; the report uses no exact numbers.
- 3-pack, ads, LSA, and Meta data were not reachable. PageSpeed is local Lighthouse (37 / 86).
- Revenue is HubSpot only. Confirm seat count, fCTO level, and AI delivery capacity.

If They Push Back

"Marketing and SEO are outside what I wanted to discuss."

Agree. This proposal has no marketing. The website and SEO audit stays optional, and the PageSpeed 37 mobile score is the only item worth a mention.

"We already use Filevine's AI and it helps some."

Keep it. The call said Filevine automation is where it falls short. The fCTO scopes what to build, and AI Workforce Pro covers the work across other tools.

"Why pay for 19 seats when we are still on a trial?"

19 matches 4 attorneys plus 15 support staff. $1,597 covers the first 5, then $120 each, so the count is easy to adjust. The fCTO turns the trial into a rollout.

Investment At A Glance

Fractional CTO Level 1 Monthly 1:1 sessions, skills deployed, and a custom automation.	**$3,297/mo** ~~$3,797~~ stand alone
AI Workforce Pro (19 users) Shared AI workspace plus a weekly implementation session.	**$3,277/mo** No stand-alone price
Marketing and Ad Spend No marketing package in this proposal.	**Not included**

Total: $6,574/mo | Save $500/mo by bundling | 2.6% of the HubSpot $3M+ revenue figure (under 35% cap)
